

## VERTI SAFE

Drainage geocomposite made of a tangled polyethylene filaments core coupled to two non-woven geotextiles, recommended for vertical drainage implementation in case of high thickness of substrate.

Characteristic	Value	Unit of measure	Test method
Height	2,40	m	
Lenght	25	m	
Mass per unit area	750	g/mq	EN ISO 9864
Tensile strength / breakage	20 / 20	kN/m	EN ISO 10319
Drainig capacity to the plane 20 kPa/100 kPa	5,48 / 0,13	l/m s	EN ISO 12958
